

Platform web untuk siklus konten marketing: **Draft** → **Schedule** → **Publish** → **Engage** → **Analyze** dalam satu dashboard. Analogi: alternatif modern Buffer — sederhana, cepat, dapat dipercaya. Integrasi sosial via Outstand (desain fokus ke connected accounts & status publish, bukan native API).

Draft

Engage

 →

Analyze

PERSONAS (SATU UI, DUA MODE)

Persona	Mode	Butuh dari UI
Maya — Manager	Visibilitas	Home, Calendar overview, Analytics
Raka — SMM (P0)	Eksekusi	Publish, Draft Editor, Queue, Inbox
Sinta — Creator	Produksi	Drafts + status handoff
Dimas / Lara	Secondary	Workspace switch / alur lean

PRIMARY NAV (URUTAN WAJIB)

1 Home

2 Publish

3 Engage

4 Analyze

5 Start Page

Publish default = **Calendar**. Badge unread hanya di Engage.

Bukan primary nav: AI Assistant · Media Library · Approval Workflow.

AI hanya **inline di Draft Editor** — tidak ada menu AI.

8 LAYAR KRITIS (PRIORITAS FIGMA)

ID	Layar	Fokus desain	ID	Layar	Fokus desain
KSP-01	Home	Status scannable	KSP-05	Draft Editor	Caption, AI, media, trust
KSP-02	Calendar	Default Publish; Failed mencolok	KSP-06	Inbox	Triage + reply cepat
KSP-03	Queue	Antrean & gap	KSP-07	Analyze	Snapshot, bukan BI penuh
KSP-04	Drafts	List + filter status	KSP-08	Accounts	Connect / reconnect jelas

CONTENT STATUS (VISUAL WAJIB KONSISTEN)

Draft	In Review	Ready to Schedule	Scheduled	Published	Failed
Netral	Koordinasi ringan	Positif ringan	Trust / confirmed	Success	Highest urgency — jangan samar

DIKUNCI VS TERBUKA

Dikunci — jangan diubah tanpa diskusi

- Urutan primary nav & siklus konten
- Dua mode Maya/Raka dalam satu UI
- 6 status + treatment Failed
- AI hanya inline di editor
- Tidak ada Approval Workflow di MVP
- UI copy: Bahasa Indonesia

Terbuka — eksplorasi designer (DS-O01–O07)

- Brand / wordmark & warna primer
- Type pairing (display + UI sans)
- Light-only MVP vs dark (preferensi: light)
- Illustration empty state
- Kekuatan warna platform di Calendar
- Detail komponen, motion, polish visual

FILTER KEPUTUSAN VISUAL (RINGKAS)

Clarity > decoration	Trust terlihat (akun, jadwal, Failed)	Status sebelum chrome UI	Satu pekerjaan per view	AI tenang sampai dibutuhkan
----------------------	---------------------------------------	--------------------------	-------------------------	-----------------------------

Jika Figma bentrok dengan keputusan UX yang dikunci → baseline produk yang menang.
